ICTS 2021-2022 Responsible Conduct of Research (RCR) Course
Course Syllabus

COURSE BACKGROUND
Eligibility
This course is sponsored by the Institute for Clinical and Translational Science (ICTS) at Washington University in St. Louis. The course is offered at no charge to trainees and scholars who are members of the Washington University Institute for Clinical and Translational Sciences (ICTS) and are enrolled in the 8-hour course. (Individuals needing fewer than 8 hours of RCR instruction are encouraged to contact the Office of the Vice Chancellor of Research to find a suitable RCR program that can meet their training needs). Students, faculty, and scholars at Washington University may join the ICTS at no cost online: Join the ICTS here.

Registration
To track completion of course requirements, scholars must register for (a) the course (register here), and (b) each individual session using links provided in the Bioethics Research Center RCR Course Calendar. Attendance will be taken at each individual session. Completion of the course requires 8 hours of attendance (see Course Requirements below for details).
For in-person sessions, scholars must sign in before the session begins. To manage class size, participation for each in-person session is capped at 50. Priority for seats in an individual session will go to those registered for the session. If a scholar is registered for the course, but has not registered for a session, he or she will be permitted to sign in and attend the session only as space permits.
For remotely delivered sessions, scholars must join the Zoom meeting before the session begins.

Prerequisite
Prior to attending the first face-to-face session, course participants are expected to complete the Program for the Ethical and Responsible Conduct of Science and Scholarship Core Curriculum, a 90-minute WEB-BASED course, consisting of eight (8) learning modules. Completion of the course is documented in your WUSTL Research Gateway Compliance Requirements profile and will be verified by the RCR Course Program Coordinator.

The prerequisite serves several purposes:
- It provides baseline knowledge required to participate meaningfully in the ICTS RCR Course.
- Whereas participants in the ICTS RCR Course have some flexibility to select topics according to their interests, the PERCSS program ensures exposure to seven core areas of RCR instruction: authorship and publication; collaborative research; conflict of interest; data ownership, acquisition, sharing, and management; mentor-trainee relationships; peer review; and research integrity.
- The PERCSS modules link to relevant WUSTL policies and resources, which will assist scholars in complying with the expectations of all research faculty and trainees at WUSTL.
COURSE MASTERS AND CONTACT INFORMATION
Alison Antes, PhD, Associate Professor of Medicine, Division of General Medical Sciences, Director of Education, Bioethics Research Center, ICTS RCR Course Co-Director

Jessica Mozersky, PhD, MBE, Assistant Professor of Medicine, Division of General Medical Sciences, Director of Consultation, Bioethics Research Center, ICTS RCR Course Co-Director

Instructors: Please see the Bioethics Research Center RCR Course Calendar to identify the instructors for individual sessions. Most instructors are WUSTL faculty with active research programs and mentoring experience. Many are affiliated with the ICTS Bioethics Research Center (BRC).

For questions regarding the syllabus or sessions, please contact, Emily Schenk, the Education Program Manager at brc@wustl.edu.

COURSE DESCRIPTION AND OBJECTIVES
The ICTS RCR Course consists of a 2-hour foundations session, which presents professional decision-making strategies and applies them to research scenarios, and a series of 1-hour face-to-face seminars on diverse topics pertaining to the responsible conduct of research (RCR). All seminars that fulfill course requirements will address one or more of the following RCR topics: animal welfare; conflicts of interest; contemporary ethical issues in biomedical research; data acquisition, management, sharing and ownership; human subjects protections; mentor/mentee responsibilities and relationships; peer review; race and biomedical research; research misconduct; and responsible authorship and publication.

We encourage scholars to select sessions in dialogue with their research mentors to ensure that a variety of topics are addressed and that individual needs are met.

Course Format: The sessions encourage active participation through methods such as small and large group discussion, case scenario analysis, writing exercises, and brief brainstorming activities. Scholars are expected to participate actively in all course sessions. The sessions also frequently draw upon SMART Strategies for Professional Decision-Making™. These strategies were originally developed for the Professionalism and Integrity in Research Program (PI Program) and are appended to the syllabus.

The objectives of the program are to foster:
- Sensitivity to ethical issues, institutional policies, and regulatory requirements in research
- Good professional decision-making skills in research
- Awareness of resources at WUSTL and elsewhere that support the responsible conduct of research
- Constructive discourse on ethics topics among scholars in the WUSTL community

COURSE REQUIREMENTS
It is strongly recommended that you attend the SMART Strategies for Professional Decision Making in Research (2 hours) prior to attending any of the other sessions. The Foundations session is the only specific session that must be completed; all other sessions are “selectives.” Two SMART Strategy sessions are offered each year. Scholars must attend and complete evaluations for a minimum of 1 Foundations session and 6 additional 1-hour sessions to complete the course for a total of 8 hours of face-to-face instruction. Each session on a particular topic will only count once towards completion of the course, so scholars should ensure that they attend 6 different sessions in addition to the foundations session. Scholars are welcome and encouraged to attend additional sessions beyond the required 8-hours.

(Updated Sept 2021)
Late Arrival and Early Departure Policy. Course participants must plan to arrive prior to the start time of each session to have their attendance documented. Participants will not be permitted to join a session late.

Leaving prior to the conclusion of a session will result in loss of credit for the session.

This policy ensures the integrity and accuracy of our documentation of participation in the RCR course, as trainees participate in these sessions to fulfill NIH training requirements. The course completion certificate verifies 8 full hours of instruction. In order to ensure that the curricular goals approved by NIH are met within our ICTS RCR program, we only recognize events listed on the Bioethics Research Center RCR Course Calendar towards course completion.

Documentation of Course Completion. Once the Program Education Manager verifies satisfaction of attendance requirements, scholars will be emailed a certificate of completion.

COURSE CALENDAR
All course sessions are listed on the Bioethics Research Center RCR Course Calendar.

Ordinarily, at least one session will be offered each month, and sessions will be posted at least 3 months in advance to allow scholars to plan their schedules accordingly.

EVALUATION
All scholars must complete an evaluation of individual sessions before the end of the session, which counts towards completion of the session.

COMPLIANCE WITH NIH AND NSF INSTRUCTION REQUIREMENTS
The RCR course is designed to satisfy the NIH Requirement for Instruction in the Responsible Conduct of Research. It may also be incorporated into plans to satisfy NSF RCR training requirements.

Scholars are expected to complete an RCR instruction program at each stage of their training (e.g., corresponding to pre-doctoral, post-doctoral, or career development awards). Scholars are encouraged to select specific sessions in discussion with their mentors to ensure that instruction best meets their needs. Mentors who are interested in participating as RCR program faculty should contact brc@wustl.edu.

# Strategies for Professional Decision Making: The SMART Approach

<table>
<thead>
<tr>
<th>STRATEGY</th>
<th>SAMPLE REFLECTION QUESTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>SEEK Help</td>
<td>• Where might I seek additional information or an unbiased, objective opinion?</td>
</tr>
<tr>
<td></td>
<td>• Would it help to involve a mediator or consultant?</td>
</tr>
<tr>
<td></td>
<td>• Do I welcome correction or input from others, including subordinates?</td>
</tr>
<tr>
<td>MANAGE Your Emotions</td>
<td>• What are my emotional reactions to this situation? Am I anxious, frustrated, or depressed?</td>
</tr>
<tr>
<td></td>
<td>• How might my emotions influence my decision-making?</td>
</tr>
<tr>
<td></td>
<td>• Would taking a “time out” or deep breath help?</td>
</tr>
<tr>
<td>ANTICIPATE Consequences</td>
<td>• What are the likely short-term and long-term outcomes of various choices?</td>
</tr>
<tr>
<td></td>
<td>• Who will be affected by my decisions and how?</td>
</tr>
<tr>
<td></td>
<td>• How might this decision impact my career and me?</td>
</tr>
<tr>
<td>RECOGNIZE Rules and Context</td>
<td>• What are the causes of the problems in this situation? Which causes can I change?</td>
</tr>
<tr>
<td></td>
<td>• What ethical principles, laws, or regulations apply in this situation?</td>
</tr>
<tr>
<td></td>
<td>• Does anyone have the power to control outcomes? If so, who and how?</td>
</tr>
<tr>
<td>TEST Your Assumptions and Motives</td>
<td>• Am I making faulty assumptions about the causes of the situation, alternatives, or others’ intentions? How can I find out?</td>
</tr>
<tr>
<td></td>
<td>• What are my motives? Are they the same as the people I serve?</td>
</tr>
<tr>
<td></td>
<td>• How will others view my choices?</td>
</tr>
</tbody>
</table>

NOTE: The strategies often overlap, e.g., testing assumptions is often a good way to manage emotions and it can lead to seeking help. Want to be SMARTER? Add “Evaluate” outcomes of your actions, and “Revise” your approach based on outcomes.
